

How to present your work in Key Stage 1

- Your work should always be your best – present your work carefully and neatly.
- You should have a date and L.I. for every piece of work – it needs to be underlined neatly with a ruler.
- Mistakes need to be crossed out neatly. Rubbers are only to be used by an adult on work that will be published.
- Stick work in carefully – all the edges need to be stuck down and put it in a sensible place on the page.

L.I. To be able to write an information text.

Panda facts

Pandas are a type of bear and are mammals. All pandas are omnivores.

Most pandas are black and white. However some pandas are red. This is why some pandas ~~that~~ are red are called red pandas. They can live up to 3 years old and that is a lot! Most pandas weigh from 75 kg - 135 kg. But not all pandas do, because if they die before weighing up to 135 kg then they can't weigh up to 135 kg or over.

Pandas can be found in thick bamboo forests high up in the mountains of central China.

Normally they fill their tummies for up to 12 hours of bamboo! They also eat small animals and fish.

Pandas talk to each other through scent marks and calls.

Did you know pandas don't hibernate. They are endangered animals and only about 1,000 are left in the world.

26.6-B Working with totals and differences Addition + Subtraction combinations

| | | | |
|---|---|---|---|
|  |  |  |  |
| Apples - 17p | Pears - 22p | Bananas - 38p | Oranges - 43p |

Lola bought two different fruit. She spent 60p. What did she buy?

$43p + 17p = 60p$ Apple + Orange = 60p ✓

$38p + 22p = 60p$ Banana + Pear = 60p ✓

Jack bought an apple and a pear. He paid with a 50p coin. He was given two coins as change. Which coins was he given?

$22p + 17p = 39p$ Coins are 10p and 2p ✓

$50p - 39p = 11p$

Riley has 70p. How many apples can he buy?

4 apples ✓

$2a = 17p$
 $2a = 17 + 17 = 34p$
 $3a = 34 + 17 = 51p$
 $4a = 51 + 17 = 68p$
